

Jet Propulsion Laboratory from NASA

Partners contact person: Brian Drouin

Where the JPL microwave, millimeter and submillimeter catalog is currently managed by Dr Brian Drouin. The JPL microwave, millimeter and submillimeter catalog is an extensive listing of molecular spectra that are generally observable in the atmospheres of earth, planetary objects and astrophysical objects. JPL is linked to KOELN as the CDMS database from KOELN is similar to JPL, provides an entry in the USA towards the astrophysical users.
